2021 TRIBAL YOUTH VIRTUAL
NATIONAL CONFERENCE

Strengthening Resilience, Promoting Healing, Restoring Culture

SHAPING BRIGHTER FUTURES WITH
AMERICAN INDIAN, ALASKA NATIVE YOUTH
AND TRIBAL COMMUNITIES

MARCH 29 - APRIL 2
A Continuum of Connectedness:
Strategies and Considerations for the Development and Implementation of Tribal Youth Substance Use Reduction Initiatives

Thursday, April 1, 2021
12:00pm AKT/ 1pm PT/ 2pm MT/ 3pm CT/ 4pm ET

Session Facilitators:
Kristina Pacheco, Gerry RainingBird,
Leon Leader Charge & Anna Clough
Tribal Law and Policy Institute
Opening in a Good Way
Today’s Facilitators

- Kristina Pacheco, Wellness Courts Specialist, Tribal Law and Policy Institute
- Gerry RainingBird, Training and Technical Assistance Specialist, Tribal Youth Resource Center
- Leon Leader Charge, Training and Technical Assistance Specialist, Tribal Youth Resource Center
- Session Moderator: Anna Clough, Co-Director, Lead for Tribal Juvenile Healing to Wellness Courts, Tribal Youth Resource Center
Session Objectives

• Review current data on drugs, alcohol, and trends impacting American Indian/Alaska Native (AI/AN) youth
• Discuss the need for early intervention, prevention, and diversion-based programs to support Tribal youth
• Consider research and training to support the development of youth-focused substance use reduction initiatives in Tribal communities
Impact of Drugs

• Many misused drugs can alter a person’s thinking and judgment, leading to health risks, including addiction, drugged driving and infectious disease.¹

• Most drugs could potentially harm an unborn baby; and cause pregnancy related issues or negative effects.²

Alcohol

• People drink to socialize, celebrate and relax. Alcohol often has a strong effect and throughout history, people have struggled to understand and manage alcohol’s power.¹
• Alcohol’s impact varies from person to person, depending on a variety of factors, including:²
  • How much a person drinks
  • How often they drink
  • Age
  • Health Status
  • Family History

2. Id.
Considerations for Youth

• CDC Youth Risk Behavior Survey (2017): 14% of high school students reported that they have used an illicit drug.
• The earlier the age of initiation of drug and alcohol use, the higher the likelihood of developing a SUD later in life. Multiple factors impact adolescent substance misuse, including: Parental substance use behavior, peer influences, media messaging/marketing, availability, and other environmental and cultural factors.²

Why do Youth Use/Try Drugs?

There are many reasons that youth use substances.¹

- Desire for new experiences
- Attempt to deal with problems
- Perform better in school
- Peer Pressure
- Natural tendencies to seek new experiences and take risks

¹ NIDA, Principles of Adolescent Substance Use Disorder Treatment: A Research Based Guide, at 3.
Drug Use and its Risks

- Teen drug use can be part of a pattern of risky behavior including unsafe sex, driving while intoxicated, and other hazardous unsupervised activities.¹
- May also result in serious social/health risks and lifelong consequences
  - School failure
  - Problems with family and other relationships
  - Loss of interest in normal healthy activities
  - Impaired memory
  - Increased risk of contracting an infectious disease via risky sexual behavior or sharing contaminated injection equipment
  - Mental health problems- including SUD of varying severity
  - Risk of overdose death

The Bigger Picture

- Monitoring the Future 2020
  - National Survey of almost 12,000 8th, 10th, and 12th Graders
    - Vaping nicotine roughly doubled for all grade levels
    - Marijuana use remained steady
    - Gradual decline of alcohol use for all grade levels
    - Increase of inhalant use among 8th graders
Native American Populations

- Alcohol and marijuana continue to be the drugs of choice among Native youth
- National Institutes of Health January 2021, Methamphetamine overdose deaths sharply rise nationwide.¹
- NIDA 8 year analysis of methamphetamine deaths across all racial and ethnic groups- Native Americans had highest death rates overall.

AI/AN and Youth Considerations

• 2018 National Survey on Drug Use and Health: AI/AN
  • Frequent marijuana use associated with opioid misuse, heavy alcohol use, and depression in youth 12-17 and young adults 18-25.¹
  • Co-occurring substance use and mental disorders are common.
  • There is a need to develop more culturally relevant prevention and intervention approaches.

Supporting Youth Along the Continuum

Prevention  Intervention  Diversion
Community-Led Prevention

- Early intervention through Tribal Youth Program initiatives
- Focus on connectedness, culture, and community-oriented strategies
Community-Led Prevention

- Build upon protective factors and youth-led strategic planning frameworks.
- Acknowledgment of local community values.
Example Programs/Initiatives

• Engage tribal youth in early intervention and prevention programs that are school or community-based
  • Programs that embrace culture, incorporation of traditional tribal teachings, delinquency prevention activities and learning opportunities to support substance use reduction
  • Allow youth leaders to engage peers in substance use reduction initiatives through peer engagement and community outreach
  • Range of program services and opportunities based on locally available resources, partnerships, and collaboration
Intervention and Diversion

- Implementation of court-based programs to support Tribal youth
- Diversion programs (treatment/crisis management)
- Tribal Juvenile Healing to Wellness Courts
Sustaining Program Success Along the Continuum

Tribal Community-Based Participatory Research

• Development of collaborative and community-based participatory research
• Support capacity building through tribally-led research initiatives
• Culturally-specific intervention and assessment
• Promote program efficacy and sustainability
Addressing Challenges to Support Program Initiatives

- Building trust
- Involvement of community stakeholders
- Supporting the mission long-term (sustainability)
- Evaluation/program improvement
- Training/program support
